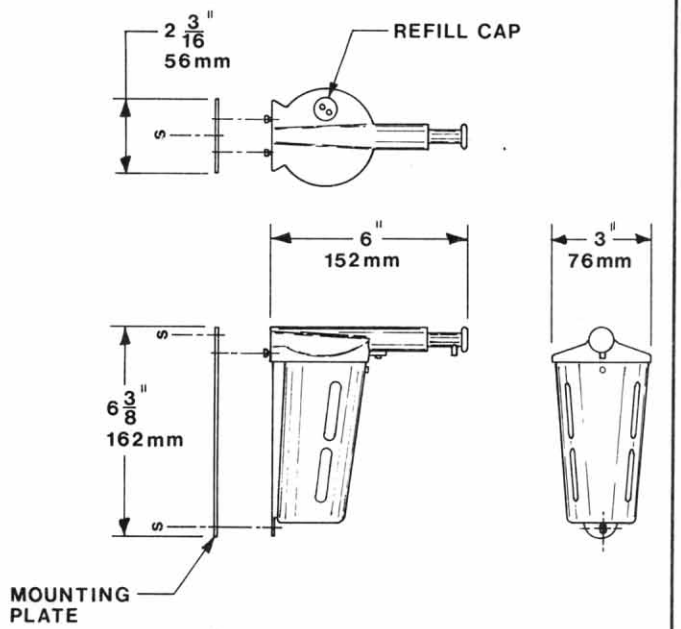
SD-2A,SD-3A

LIQUID, LATHER SOAP DISPENSERS



DESIGN CONSIDERATIONS

• The SD-3A lather model delivers a rich, creamy soap that provides approximately 30% more hand washings than the SD-2A liquid dispenser. In addition, the lather does not run off the hands, as may occur with straight liquid soaps. Therefore, the SD-3A is the most economical specification.

MODEL NUMBERS (select one)

☐ **SD-2A**—Liquid ☐ **SD-3A**—Lather

FINISH (select one)

☐ Bright Chrome Plated (standard)

☐ Other (additional charge; see Finish Schedule, Ref. Sec. A)

OPERATION

Model SD-2A valve pushes in to dispense liquid soap. Model SD-3A valve pushes in to dispense liquid soap in lather form. If necessary, valve may be primed by holding finger over spout during outward stroke until soap flows smoothly. Integral check valve controls soap flow. Slits at side of unit indicate soap level. Chained refill cap is unlocked with service key to resist tampering. For best performance, use vegetable-base soap with a 10-20% soap concentration.

SUGGESTED ARCHITECTURAL SPECIFICATION

TSM model _____ (SD-2A Liquid or SD-3A Lather) Soap Dispenser from Tubular Specialties Manufacturing, Inc., Los Angeles, California (213) 515-4801. Dispenser: heavy duty chrome-plated steel housing with clear polyethylene globe. Mounting: vandal resistant with keyed refill cap. Valve: chrome-plated brass body with stainless steel valve mechanism. Capacity: 12 ounces (0.4 liter). Manufacturer's name is not shown on any exposed surface.

MATERIALS/WORKMANSHIP

Dispenser Body—Heavy duty chrome-plated steel. Capacity: 12 ounces (0.4 liter). Clear polyethylene globe.

Valve—Chrome-plated brass body with stainless steel valve mechanism.

INSTALLATION

Dispenser is surface mounted using screws provided by manufacturer at locations marked by an "S".
